BY EESTAIRS

SIGNATURE SPRAY FINISHES

## EEPAINT ATMOSPHERES

- 1 — Calm & refinement
- 2 — Natural & balanced
- 3 — Warm & welcoming
- 4 — Energy & accent
- 5 — Fresh & renewed

Each EePaint™ finish is developed with one goal: a surface that not only looks perfect at handover, but also keeps that appearance in everyday use. From bold statements to understated luxury: EePaint™ adds character.

## EEPAINT FAQ

### What is EePaint™?

EePaint™ is a curated range of spray finishes (colours and effects) that EeStairs applies to steel components and EeSoffit™. Each finish is selected for its appearance, consistency and suitability within stair design.

### What looks are possible?

From matte and quiet to distinctive metallic or “brushed” effects. Some finishes feel warmer (bronze/champagne), others cooler or more graphic. The exact options depend on the project and the selected components.

### Where is EePaint™ applied?

Typically on visible parts such as the underside and sides of the stair, stringers, balustrades, handrails, frames, edges and details — and on EeSoffit™. We advise per component what works best, both technically and aesthetically.

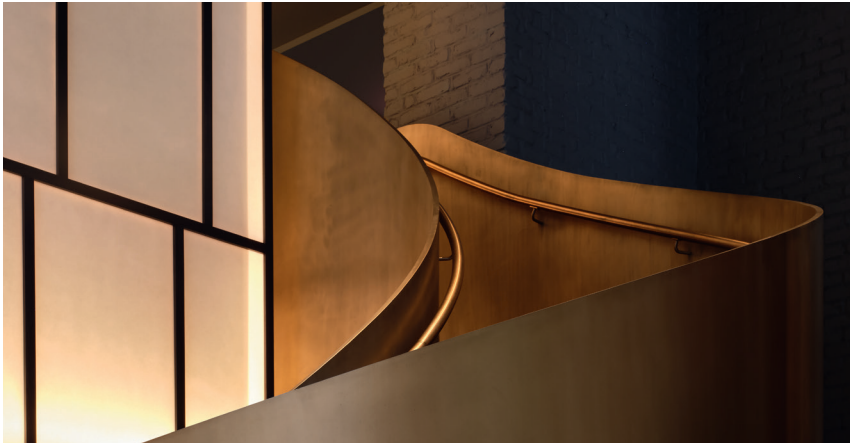

### Which EePaint finishes are available?

These can be found online, and are shown in a small overview below.

## EPAINT BY EESTAIRS

EePaint™ is EeStairs' in-house finish programme for stairs, balustrades and details. Think a deep, even colour layer — or a layered metallic look with subtle reflection — always crisp, consistent and designed to strengthen architecture.

EePaint™ goes beyond “beautiful”. Colour becomes part of the experience: a quiet base that brings calm, or an accent that adds energy and character. The newest colours are developed to not only connect spaces visually, but also steer emotion and atmosphere — from calm and sheltered to fresh and expressive.
