# **e<sup>e</sup>stairs**

EeStairs is a people-oriented design and manufacture company specialising in stylish, ingenious staircases and balustrades. As a creative supplier it challenges the established order. Its approach and results are unusual in their design and execution.

EeStairs injects passion into everything it does as expressed by the products it supplies. EeStairs is able to surprise its clients with outstanding stairs. Passion, skill and experience have reserved EeStairs a unique position in a global marketplace.

EeStairs enjoys working with clients who appreciate its focus on design and quality and who count respect, authenticity and creativity among their core values. EeStairs' client relationships are founded upon a mutual appreciation for a premium service and product.

Good design doesn't have to be expensive. EeStairs has proven this once again with its Moon™ staircase design concept. Following on from the 1m2™ staircase, the Cells™ design and the TransParancy 1-03™ series, this is EeStairs' latest Standard Design. These concepts put a designer staircase within easy reach, even on a limited budget.

EeStairs products are characterised by their striking designs and inspiring applications. The Moon™ staircase is an intelligent solution with an eye-catching appearance. Thanks to the innovative manner in which the staircase treads are fixed to the central pillar, nothing is visible from the outside. This makes the staircase's design both practical and stylish, one that can be used for residential and commercial purposes.

### Advantages of Moon by EeStairs®:

1. Spiral staircase with invisible treads
2. A designer staircase within a limited budget
3. Available in several heights (with a maximum of 20 treads)
4. A practical design solution
5. Suitable for homes, shops, offices or public buildings
6. Floating treads are available in a variety of shapes and finishes
7. Treads can be made from different materials, such as wood or stone
8. Choose from SS or steel for the central pillar and railings
9. The range of different options makes every Moon staircase unique

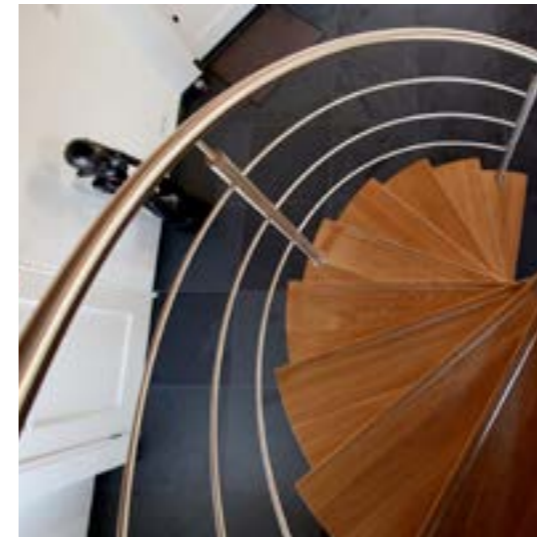

### Characteristic:

Moon by EeStairs® is one of our Standard Designs. The concept allows each client to influence the final result. With the Moon™ staircase, clients can choose from a variety of materials and shapes. This makes each staircase unique.

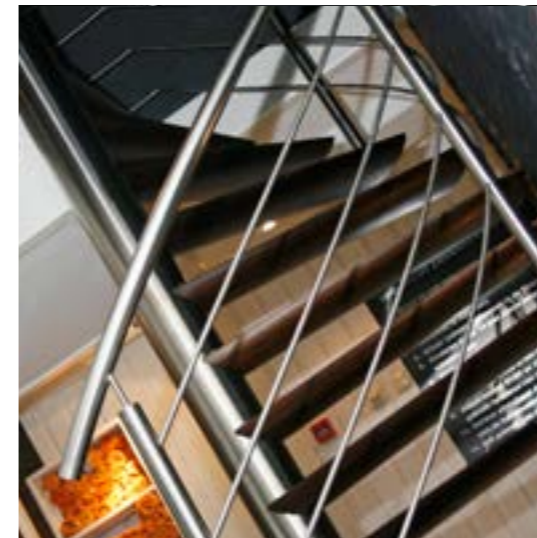

### Point to note:

You will get the best result if we can advise you at an early stage of your project. And as long as we are named in the specifications we will continue to provide this service free of charge and any obligation.

### Standard Design

**EeStairs offers a broad range of special, pre-designed staircases, which will enhance the appearance of your entire space; we call these Standard Designs.**

Our selection comprises of standard models complemented by a number of attractive options. Due to the basis of each design being standard, the staircases can be produced easily and quickly, at a price that offers excellent value for money. Whilst additional options ensure that each staircase is unique.

### Moon™ staircase

**Our Standard Designs offer you the opportunity to enjoy designer staircases and balustrades in a way that fits your budget. The Moon by EeStairs® is a fabulous example of this.**

EeStairs® Moon is an elegant spiral staircase with subtle, floating treads. These treads have an aesthetically appealing curved underside and are invisibly attached to the centre column, making risers unnecessary. The result, a slim staircase with an understated appearance.

### Materials

**The choice of staircase treads are wood or stone, which can all be customised into unique and different shapes. For the centre column and the balustrade, there is the option of using steel or SS.**

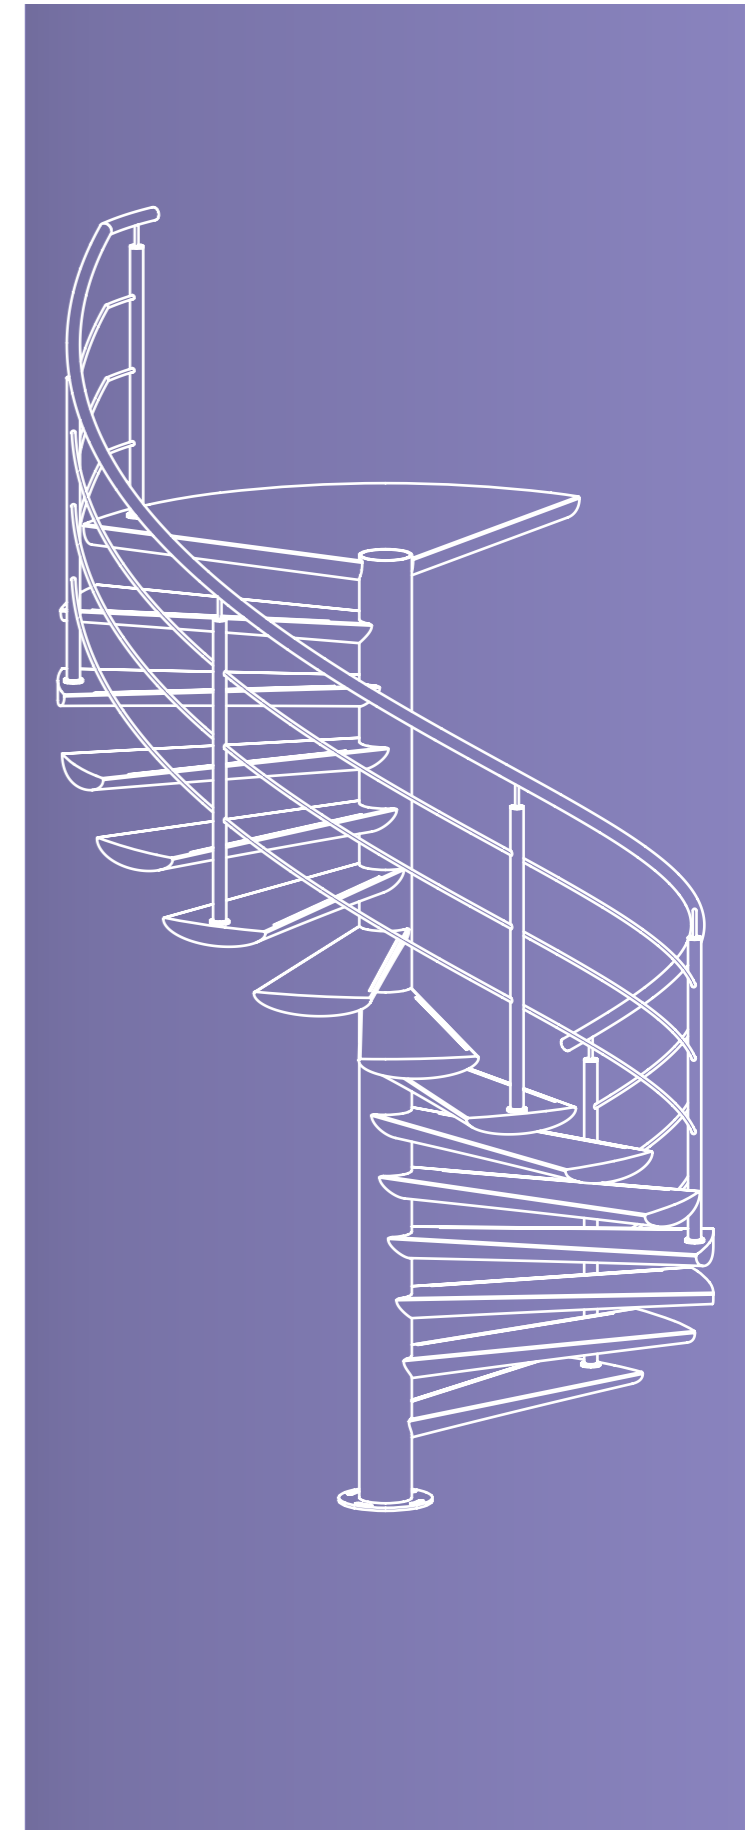

The balustrade contains guard rails that are attached to the treads. By combining the various possibilities, you are therefore able to create your own unique staircase with eye-catching aesthetics. Thought a designer staircase would be unaffordable? Moon™ proves this needn't be the case!
